

Dear FCC,I am greatly disturbed by the actions of the National Association of Broadcasters in moving to restrict XM Radio's right to broadcast traffic and weather. XM Radio provides me with a level of variety and quality that is not available on broadcast radio. I therefore gladly pay for the services of XM Radio. As such, it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear.

I respectfully urge you to reject the NAB's petition 04-160 as it is merely an attempt to stifle free speech as well as healthy competition.

Sincerely,

David J. Nadeau...
